# MAINE MARITIME ACADEMY
Corning School of Ocean Studies

September 12, 2022

What can robots reveal? An initial exploration of New England lakes using autonomous surface vehicles.

Dr. Emily Arsenault
Postdoctoral Research Associate at Bates College

Dr. Arsenault studied environmental science and biology at Colby College ('14), and received her masters and PhD degrees in Ecology & Evolutionary Biology from the University of Kansas (in '17 and '21), where her research focused on fish food webs in grassland rivers. She is currently a Postdoctoral Research Associate at Bates College, where she has been working on NSF EPSCoR-funded lake water quality monitoring work using new technologies with Dr. Holly Ewing and others.

3:00 - 3:50 PM
Delano Auditorium, Maine Maritime Academy
Livestream: streaming.mma.edu
Full seminar schedule: https://mainemaritime.edu/ocean-studies/seminar-schedule/
