Trick's End Headquarters

DEDICATION

The 1990 Trick's End is
dedicated to the memory
of...

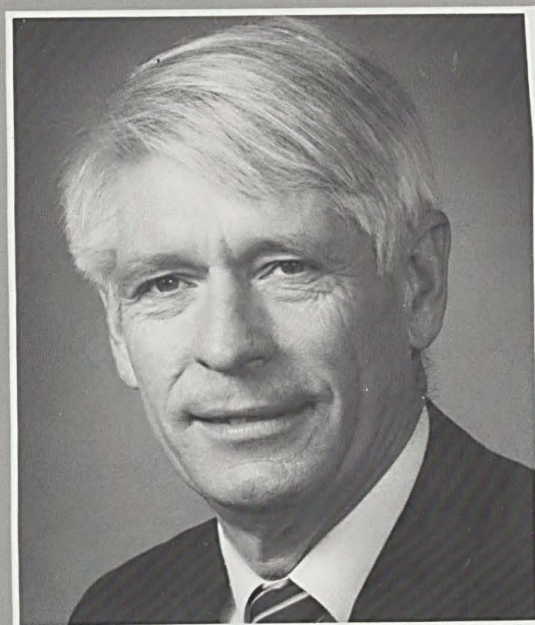

Adora M. Leach

Mrs. Leach gave more than thirty years of dedicated service to this Academy.

As the Admissions & Financial Aid Administrator, she had direct contact with thousands of students over the years, helping them with the admissions process, and then keeping track of academic credits, sea time, and graduation requirements. She also served as the Academy's liaison officer with the U. S. Coast Guard, coordinating the procedures for the licensing of the Cadets as Merchant Marine Officers.

In all these responsibilities, she maintained the highest personal and professional standards. With Mrs. Leach, the Cadets always came first. She was a warm and caring friend to all of us, and one who will be greatly missed.

The name of Adora M. Leach will forever remain a part of the history of Maine Maritime Academy...

Kenneth M. Curtis
President

TO THE CLASS OF 1990

As your class completes its years at Maine Maritime Academy, you face a world where change is moving at an incredible pace. The removal of the Berlin Wall, the Pro-Democracy movements in countries such as Poland and Hungary, and even free elections in the Soviet Union are events we could not have imagined when you entered the Academy as Freshmen.

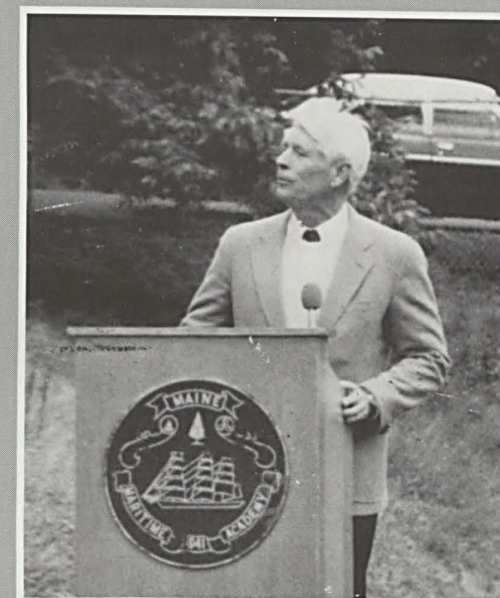

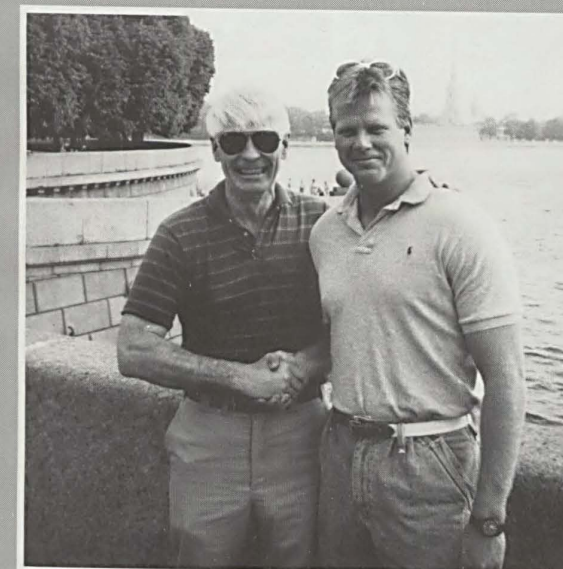

We can only guess where the next decade will take us. One thing, however, is certain. Educated men and women, who also have a sense of values, are needed more than ever before. I'm confident that you will meet that need, and that your class will make important contributions to the country and to the world.

Your experience here has been characterized, not only by a demanding curriculum, but also by an exposure to the principles of discipline and leadership. These qualities will set you apart, and will enable you to compete on a high level in engineering, in the shipping industry, and in the whole range of careers that lie ahead for the Class of 1990.

I wish you all success in achieving your goals. Know that the Academy's interest in you is genuine and that it will continue far into the future.

Sincerely,

Kenneth M. Curtis
President

Commandant of Midshipmen

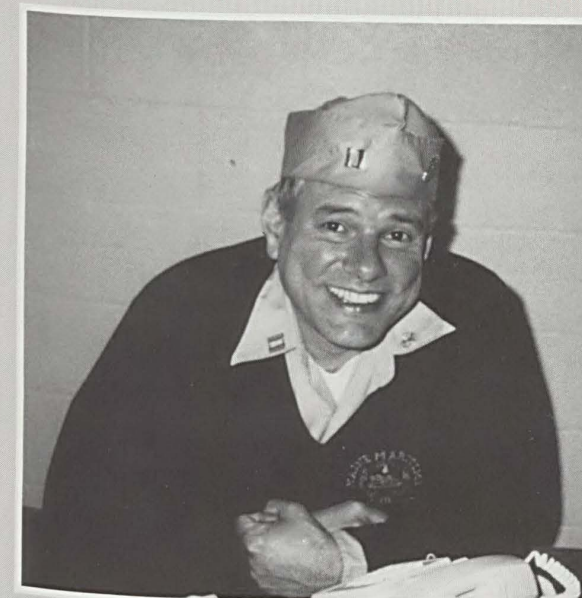

TO THE CLASS OF 1990:

I am excited for each and every one of you as you embark on your various careers all over the world. It is time for you to go out and make your mark and for this you are now armed with a quality education and the management experience you gleamed from your participation in the Regiment. How you use it is up to you but the true measure of your success is, and will always be, how well you get along with the person looking back at you in the mirror. If that relationship is to flourish then it must be based on integrity, accountability, and responsibility. Never forget who you are.

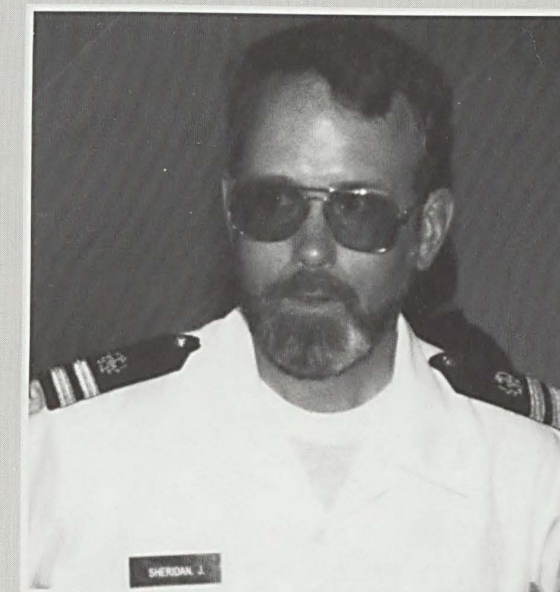

Lieutenant Commander Frost, Lieutenant Hurd, Lieutenant Sheridan, and Elizabeth Tyler join me in wishing each of you "fair winds and following seas". BRAVO ZULU!

Sincerely,

V. H. Corry

The wind picked up,
& the seas grew rough.
Sam had just eaten,
this would be tough.
His stomach bubbled,
& then he burped.
He rushed to the head,
"Excuse me!" he chirped.
His audible groans became extremely
amusing,
to those watchstanders Sam had been abus-
ing.

The Underclassed

Hey Val... Try plugging it in!

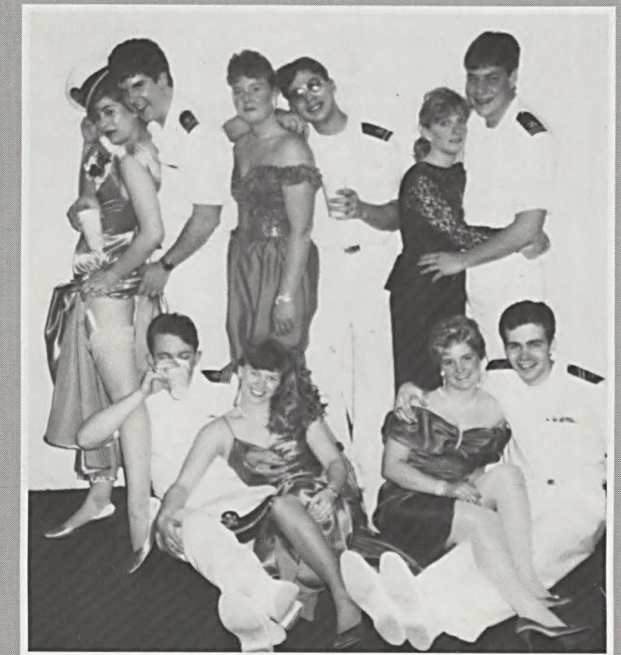

Fastest wrist in the West!

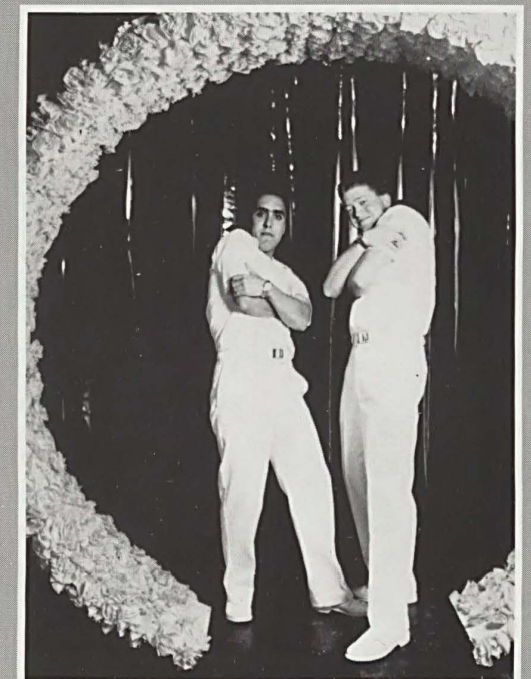

The ring is sectioned into three parts: The top which signifies honor, the Academy part which signifies loyalty, and the career side which signifies devotion to duty.

Under the date of Graduation is the three pronged spear of Poseidon, better known as the trident, the symbol of power. Just beneath the trident is the American Bald Eagle perched on a helm. The king of birds symbolizes freedom through might and courage. The sword, called the most romantic of weapons, is the symbol of war and has been worn as a badge of honor among fighting men since iron and steel were first used as weapons. The Anchor is the symbol of secureness and even more traditionally the symbol of Hope. The lighthouse between the serpents is a representation of Dice's Head Lighthouse. It marks on the ring the first home landmark seen by the Training Ship after a cruise. And finally, the chevron represents the leadership responsibility we must share. . .

Ring Dance 1989

The Class Of 1990...

Eric Matthew King

Center Conway, New Hampshire

**Marine Transportation & Management
Regimental Commander
Striker
Outing Club President**

To my classmates:

Four years ago, most of us arrived here in Castine a little unsure of just what we were getting ourselves into. For some of us, our days at the Academy will be the most memorable of our lives, while others will only want to push them into the past. As we leave MMA, we are leaving with more than just an education. We are leaving with a sense of pride, commitment, and achievement.

Trying to look back at just how we behaved and viewed life as a freshman is totally different today. Instead of obstacles and burdens, our paths are now full of opportunities and fulfillment.

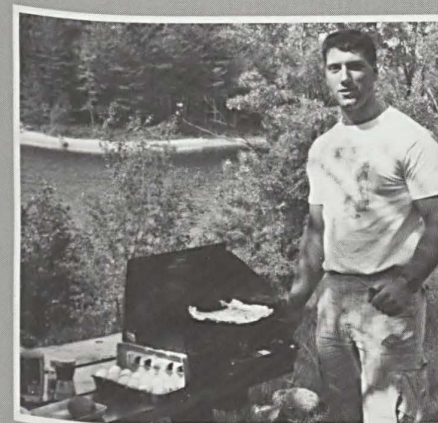

Words are hard to come by when trying to express myself at the class's willingness to to accept many changes that occurred while at the Academy. As with all things in life, change is usually inevitable, and sometimes resented. But all of us must realize that we too have changed, and will forever do so, from the moment you first set foot on campus, to commanding your own life.

Good luck in the years to come.

Eric M. King
RC 1989-1990

This page is dedicated to my father who has supported and encouraged me over the past four years.

I also dedicate this page to my mother who showed me the courage and strength to pursue my dreams

Finally, after four years of hard labor, it's time to take to the skies. . .

The New Face of Eastern Europe

For decades East Germany was a model hard-line Communist state. Deep inside its borders lay Berlin, the old capital of Germany, now divided into four zones of occupation. In 1948, in an effort to drive the Western powers out of Berlin, the Soviet Union blocked road and rail access to the city. U.S. Pres. Harry Truman responded with the Berlin airlift. During the next 11 months, well over two million tons of food, medicine, fuel, machinery, and other vital supplies were flown into the beleaguered city. Then, in 1961, desperate to stop the flight of East Germans to the West, the government created the Berlin Wall. Two days after the first barbed wire barricades went up, an East German guard leaped to freedom. Escape routes, including second floor windows in nearby buildings, were sealed one by one. Chris Geoffroy was one of many would-be escapees who never made it.

Painting The Town

SENIORS: In a "kinder, gentler Regiment", traditions take a back seat to being inoffensive. It is difficult to find a new tradition, and even more difficult to make it last. From the ideas of members of our class, it has been decided that a tradition shall be brought forward from history, and so be it . .

On Friday, 6 April, at 1600, the INFAMOUS SHOE TOSS shall be re-enacted. Pairs of (now useless) shoes will be tied together, painted green, and used to re-foliate the GREAT ELM SHOE TREE.

Best Of Luck To The
Class Of 1990

Maine Maritime Academy Parents
Association

Pepsi Cola Bottling Co. of Bangor
Wilson Street • Brewer, Me.

In that year, colonists built their first ocean-going vessel. Christened the *Virginia of Sagadahock*, it sailed from a little shipyard just twelve miles down river from the present site of the Bath Iron Works.

Since its founding in 1884, Bath Iron Works has added many "firsts" to Maine's catalogue of maritime achievements. And through the years, we've made the hallmark "Bath-built" a synonym for shipbuilding excellence.

In the years to come, we will build ships in Bath and repair others in Portland. And each ship will carry a part of Maine's proud maritime heritage to the oceans of the world.

Thanks, Maine, for a great shipbuilding tradition.

*Maine
launched the
U.S. Merchant
Marine
in
1607.*

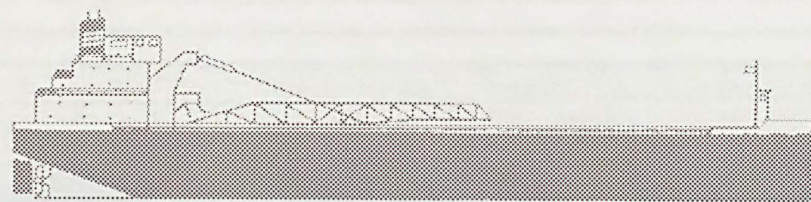

A history of Bath Iron Works is
on exhibit at the Maine Maritime
Museum in Bath.

Producing one quarter of Maine's electricity is just the beginning

Maine Yankee keeps Maine working in many important ways. We employ over 300 skilled men and women who work around the clock to provide the most economical electricity in Maine. In addition, Maine Yankee provides work for about 1,200 contractor employees during re-fueling outages which generally occur every other year.

As one of Maine's largest employers, our payroll is over \$13,300,000 annually. And we pay over \$7,000,000 in taxes to state and local governments.

By providing reliable and low-cost electricity, Maine Yankee also makes an important contribution to the economic well-being of Maine's employers, both large and small.

If you'd like to know more about Maine Yankee, we welcome your visit to our Energy Information Center at the Maine Yankee plant in Wiscasset. Hours are 12 noon to 4PM, 7 days a week. For more information, call 1-800-458-0066.

We're proud of what we do and look forward to continuing to serve the people of Maine in the future.

Military Sealift Command

YOU'VE WORKED HARD FOR YOUR DEGREE, NOW LET IT WORK FOR YOU. . .

Maine Maritime graduate OWEN CLARK did when he joined MSC in 1979. He began his career as a third officer and after only four years he earned his Unlimited Masters license becoming the youngest master in the Military Sealift Command and the U. S. Merchant Marine. His first command was aboard the USNS Persistent. His other commands include USNS Mohawk, USNS Algol, USNS Mississinewa, and USNS Neosho. His favorite ship is the USNS Persistent, a surveillance ship. He reported to the USNS Maury in April 1988. Asked what he likes about MSC, Owen said, "a treasure trove of opportunity".

FOR INFORMATION ABOUT CAREER OPPORTUNITIES WITH MSC, CONTACT:

THIS FLAG IS OUR FLAG.

For 90 years, the American flag has flown on every Lykes vessel—in times of peace and times of war—wherever in the world we sailed.

Today, that flag on our 29 vessels means jobs for American seamen, work for American longshoremen, and careers for Americans in our offices in more than 20 cities throughout the United States.

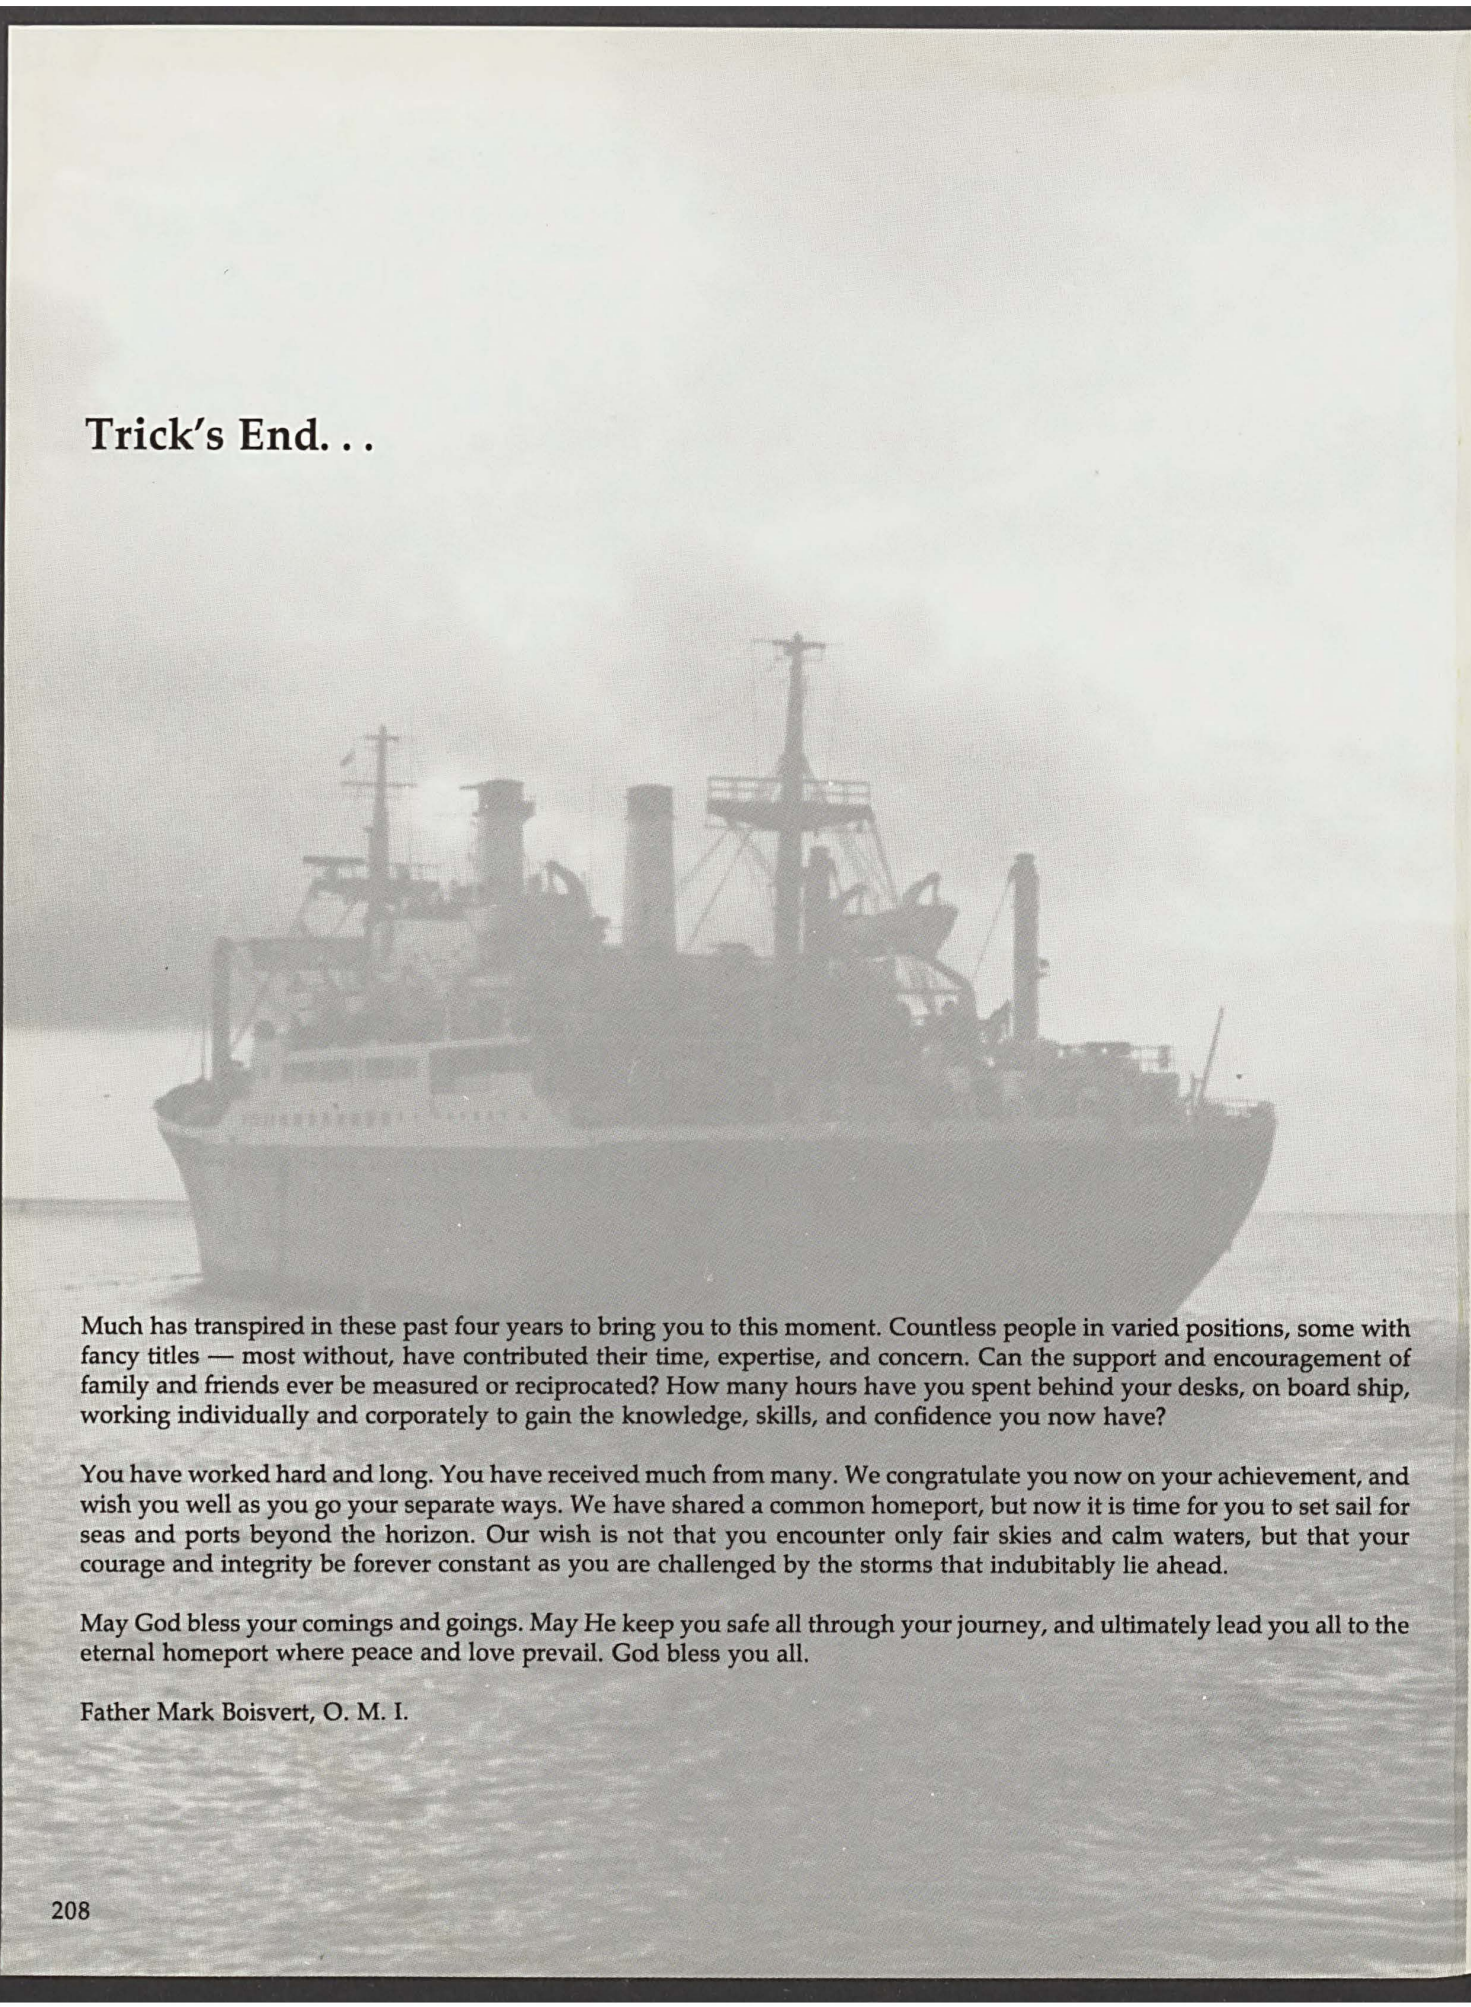

As our stars and stripes enter ports from Rotterdam to Jakarta it means American goods produced by American workers going to the world marketplaces. It means American know-how and spirit is alive and well and proudly growing. It means America's defense is strong and that its Merchant Marine is still at the ready.

Our flag is the symbol to the world of people living in a free country. At Lykes, it's also a symbol of how good a shipping company can become.

For more information, call us at (504) 523-6611, and put America to work for you.

© 1989 Lykes Lines

A large cargo ship is shown from a low angle, sailing on the ocean. The ship has multiple masts and funnels. The sky is overcast and hazy, creating a somber atmosphere. The ship is moving towards the left side of the frame.

Trick's End...

Much has transpired in these past four years to bring you to this moment. Countless people in varied positions, some with fancy titles — most without, have contributed their time, expertise, and concern. Can the support and encouragement of family and friends ever be measured or reciprocated? How many hours have you spent behind your desks, on board ship, working individually and corporately to gain the knowledge, skills, and confidence you now have?

You have worked hard and long. You have received much from many. We congratulate you now on your achievement, and wish you well as you go your separate ways. We have shared a common homeport, but now it is time for you to set sail for seas and ports beyond the horizon. Our wish is not that you encounter only fair skies and calm waters, but that your courage and integrity be forever constant as you are challenged by the storms that indubitably lie ahead.

May God bless your comings and goings. May He keep you safe all through your journey, and ultimately lead you all to the eternal homeport where peace and love prevail. God bless you all.

Father Mark Boisvert, O. M. I.
